The Swinging '60s was an innovative era where there was a youth culture and the old way. The hair became longer, the skirt shorter and the love became much more free. Between the London revamp and the American hippies who overtred San Francisco, everything changed during this influential 10 years. British music invaded america, America invaded Vietnam and powerful social movements shook the world. Beatlemania swept the world, and everyone was swaying up the stairs to heaven by purchasing led zeppelin records. Activists marched with Dr. Martin Luther King, and U.S. Vietnam War protesters put flowers on the guns of riot police and even gathered to protest the Pentagon. In the 1960s, LSD flowed freely and people truly believed that anything was possible. People attended Woodstock, identified as Forest, and had flowers on their heads. While the influence of East and West music overtakes sound waves, colorful prints and patterns dominated fashion. With all these big changes, it's no surprise that language has also changed. In fact, a lot of 60s slang is regularly used by people of all ages as reintroduced to the younger generation. They include primates, bats and elephant shre. Catfish lays externally modified eggs. Many types of catfish are cystovarian. This means that their eggs pass through the oviduct and continue to the outside and do not develop in the womb. Catfish make nests at the bottom of streams, lakes or ponds, deposit eggs, or deposit eggs at the bottom of rocks like circling lambs. After the male fertilizes them, he can actually chase the female and protect the eggs. In other species, both mates and females protect eggs and fry. A hundred slang is a form of slang in which words are spelled out and/or backwards. According to dictionary scholar Eric Partridge, back slang was popular with coasters (street vendors) in Victorian London. Partridge says the hallmark of their speech is the frequency with which words (normal or slang) are changed to backswng. The general rule is to spell words backwards, and, ideally, to use the closest approaching pronunciation to an often impossible array of characters (slang today and yesterday, 1960). Coster himself mentioned slang again as a cartaxi zenal. Like rhyming slang, slang again began as a hideout, says Michael Adams. If you want to speak freely around people who don't know the secret, learn how to form slang or center slang. When you're next in your area, order the top o'reeb instead of a 'pot of beer', but the bartender is pleased to understand slang, or you can be eighty and six for a full cue 'week'. But don't blame the bartenders, who may not be the right copper 'people' for bluefin' emag 'bloomin' games.' (Michael Adams, Slang: Poetry of the People. Oxford University Press, 2009) Backspedic is a language built on the line - I venture to imply an illogical line - itself. The initial idea was that every word should be pronounced backwards. For example, instead of saying 'no', say 'dab nam' for 'bad guy'. But it didn't go until we found the initial idea crumbling. 'Penny' will be 'ynnep', reversed, a hundred slang says 'yennup'. 'Ebig M. Enuup' is his version of Give Me a Penny. It would be impossible for the English tongue to pronounce many of our words backwards. Do you want to pronounce 'chestnut' or 'drink' upside down to leave the spelling intact? We shouldn't talk about more difficult examples. As a result, 'back slang' adopts not only random spelling, but also its own randomness. (Slang, all year long: Weekly Journal conducted by Charles Dickens, November 25, 1893) You won't understand what you're talking about ('Ewig reh emos delo garcs dene' -give her some old scrag ends) consisting of simply saying each word backwards, when it's impossible to say the name of the letter instead of sound, usually the first or last character, therefore: 'Uoy nac ees reh screin gimwosh' (you can see her showing her underwear). The Enfield Master reports that he has found 'at least half a dozen boys who can talk quickly'. (Iona and Peter Opie, students' stories and languages. Oxford University Press, 1959) secret language. . . . It has a clear appeal to those who have something to hide. One language used by African slaves, called TUT, was based on voice and was used to teach children to read. Meanwhile, Victorian market traders dream of 'back slang' and are believed to be sifting through customers who palm off sloppy goods by offering a 'yob' for a 'boy' who says one word backwards. (Laura Barnett, why we all need our own secret slang, Guardian [UK], June 9, 2009) This white language, back slang or 'cabransna' should be considered a distinct and regular mode of inter-communication by a rising generation of street sellers, as coasters call themselves. Those who hear this slang for the first time do not mention it in the original by reversing the word. And Jannuff, Esclaw and Nammo are considered secret terms. People who practice slang will soon get a significant stock vocabulary so they understand and talk rather than remember. Between senior coasters and those who pride themselves on their ability in backstory, the conversation often lasts for the entire evening - that is, the main word is in the back door - especially if any apartment wants to show up or confuse... Back slang has been in vogue for many years. It is... Very easy to acquire, and is mainly used by coasters and others who practice it. . . It's about passing on the secrets of street trading, communicating costs and profits on goods, and keeping nature's enemies and cops in the dark. (Slang dictionary: emansi advances, history, anecdotes, rev. ed., 1874) 1874)
